2006 Annual Index

SUBJECTS

An Interview with...

Steven F. Swaim; January, pp 10-11.

Jane Armstrong; February, pp 73-74.

Donald L. Piermattei; March, pp 138-139.

Robert M. Miller; April, pp 196-198.

Denis Marcellin-Little; May, pp 258-259.

Stephen P. DiBartola; June, pp 337-338.

Robin Downing; July, pp 418-420.

William J. Tranquilli; August, pp 488-489.

Ad Rijnberk; September, pp 556-557.

Ellen N. Behrend; October, pp 633-634.

Corinne R. Sweeney; November, pp 705-707.

Robert L. Leighton; December, pp 758-761.

Anesthesia

Anesthesia-related hypotension in a small-animal practice; January, pp 22-26.

Practical Matters: Abnormally low capnography readings may not be due to hyperventilation; October, p 639.

Animal Abuse

Animal abuse: What practitioners need to know; August, pp 506-518.

Animal hoarding: Its roots and recognition; August, pp 520-531.

Animal Welfare

Guest Commentary: Now is the time to take a stand on animal welfare; August, p 482.

American Association for the Advancement of Science Annual Meeting—Veterinary ethics: Controversies, Challenges, and Opportunities; August, p 501.

American Association for the Advancement of Science Annual Meeting—Animal rights: Good or bad for veterinarians? August, p 501.

American Association for the Advancement of Science Annual Meeting—Ethical issues in companion-animal practice; August, p 502.

American Association for the Advancement of Science Annual Meeting—Society, laboratory animals, and the laboratory-animal veterinarian; August, p 502.

American Association for the Advancement of Science Annual Meeting—Improving the welfare of farm animals; August, p 503.

American Association for the Advancement of Science Annual Meeting—All for one and one for all? August, p 503.

American Association for the Advancement of Science Annual Meeting—Wildlife in captivity: Ethics and zoos; August, p 504.

American Association for the Advancement of Science Annual Meeting—Veterinarians and animal welfare: What role should the profession play? August, p 504.

Atopic Dermatitis

Allergen-specific immunotherapy for canine atopic dermatitis: Making it work; September, pp 590-605.

Client information sheet—Allergen-specific immunotherapy: 4 easy steps for home administration; September, pp 607-608.

Avian Influenza

Update — Avian influenza: An emerging feline threat? June, pp 344-347.

Avian Medicine

Knemidocoptiasis in birds; December, pp 782-790.

Behavior

Ensuring a behaviorally healthy pet-child relationship; October, pp 670-682.

Client information sheet—Bringing home baby: Introducing a pet to your new arrival; October, pp 683-684.

CVC Highlights: Dispelling the myth of the asocial cat; November, p 712.

Helping owners handle aggressive cats; November, pp 719-727.

Biliary Cystadenomatosis

Clinical Exposures: Biliary cystadenomatosis in a ferret; April, pp 199-200.

Brachial Plexus Tumors

Research Updates: The utility of ultrasonography to detect brachial plexus tumors in dogs; May, p 267.

Canine Influenza

CVC Highlights: Canine influenza: Risks, management, and prevention; November, p 714.

Canine Pancreatic Lipase Immunoreactivity Assay

Is it pancreatitis? March, pp 158-167.

Serial serum pancreatic lipase immunoreactivity concentrations in a dog with histologically confirmed pancreatitis; March, pp 170-176.

CAPC

CAPC guidelines offer best practices for parasites; March (suppl.), p 2.

Primary guidelines of the Companion Animal Parasite Council; March (suppl.), pp 2-4.

Capnography

Practical Matters: Abnormally low capnography readings may not be due to hyperventilation; October, p 639.

Cardiology

Skills Laboratory: How to determine and interpret the mean electrical axis; January, pp 28-36.

Performing a cardiovascular physical examination; January, pp 37-47.

Pimobendan: Understanding its cardiac effects in dogs with myocardial disease; October, pp 660-668.

Centrifugal Fecal Flotation

Why we gave fecal centrifugation a spin; July, p 414.

Optimize intestinal parasite detection with centrifugal fecal flotation; July, pp 455-464. Clarification: September, p 562.

Chemotherapy

Practical Matters: Things to remember to calculate chemotherapy dosages correctly; October, p 638.

Client Information Sheets

Allergen-specific immunotherapy: 4 easy steps for home administration; September, pp 607-608.

Bringing home baby: Introducing a pet to your new arrival; October, pp 683-684.

Clinical Exposures

Mycobacterium avium infection in a dog; January, pp 14-18.

Intervertebral disk disease: An unusual cause of a cat's lameness and tail weakness; March, pp 150-155.

Biliary cystadenomatosis in a ferret; April, pp 199-200.

A dog with a nonhealing flank wound; August, pp 495-500.

Corns

Using a dental root elevator to remove footpad corns in dogs: Two practitioners' experience; December, pp 778-780.

Corrections/Clarifications

Idiosyncrasies in greyhounds that can affect their medical care (August 2005); February, p 72.

Optimize intestinal parasite detection with centrifugal fecal flotation (July 2006); September, p 562.

Idea Exchange: Repairing mandibular symphyseal fractures with no slipping (June 2006); September, p 562.

Dental Corner: A foundation for treating canine periodontal disease (October 2006); December, p 762.

Cruciate Ligament Rupture

Research Updates: Surgically treating cruciate ligament rupture in cats; May, p 268.

Cryptosporidiosis

An update on three important protozoan parasitic infections in cats: cryptosporidiosis, giardiasis, and tritrichomoniasis; March (suppl.), pp 18-32.

CVC Highlights

Dispelling the myth of the asocial cat; November, p 712.

Canine influenza: Risks, management, and prevention; November, p 714.

Tapping social workers to help support distressed pet owners; November, p 715.

Don't miss these commonly misdiagnosed gastrointestinal diseases; November, pp 716-718.

Cystoscopy

Endoscopy Brief: Transurethral cystoscopy and diode laser incision to correct an ectopic ureter; September, pp 558-559.

Dental Corner

Feline gingivostomatitis: How to relieve the oral discomfort; February, pp 76-78.

Canine orthodontics: Providing healthy occlusions; July, pp 427-433.

A foundation for treating canine periodontal disease; October, pp 640-649. Correction: December, p 762.

Dermatology

Practical Matters: Control recurrent pyoderma by determining its cause; February, p 92.

Allergen-specific immunotherapy for canine atopic dermatitis: Making it work; September, pp 590-605.

Client information sheet—Allergen-specific immunotherapy: 4 easy steps for home administration; September, pp 607-608.

Diabetes Mellitus

Suggested Reading: Which insulin should I choose now that my options have dwindled? May, pp 262-265.

Diagnostic Procedures

Skills Laboratory: How to determine and interpret the mean electrical axis; January, pp 28-36.

Practical Matters: Differentiate cocci from imposters in the urine; February, p 92.

Practical Matters: Boost your hypoalbuminemia workup; February, p 92.

Is it pancreatitis? March, pp 158-167.

Key gastrointestinal surgeries: Intestinal biopsy; April, pp 220-225.

Research Updates: Determining the significance of blood chemistry changes in dogs with GI foreign bodies; May, p 267.

The diagnostic approach to asymptomatic dogs with elevated liver enzyme

2006 Annual Index

activities; May, pp 279-288.

How to perform a surgical hepatic biopsy; May, pp 306-311.

Editors' Guest: Why we gave fecal centrifugation a spin; July, p 414.

Practical Matters: Urine cortisol:creatinine ratio—the most useful normal test around; July, p 424.

Optimize intestinal parasite detection with centrifugal fecal flotation; July, pp 455-464. Clarification: September, p 562.

Digital Radiography

Get the answers you need about digital radiography; December (suppl.), p 2.

Digital radiography: Is it a good fit for your practice? December (suppl.), pp 4-8.

Exploring your digital radiography equipment options; December (suppl.), pp 9-13.

Getting the most out of digital image viewing; December (suppl.), pp 14-18.

An introduction to DICOM; December (suppl.), pp 19-20.

How to store digital images and comply with medical recordkeeping standards; December (suppl.), pp 21-24.

Dinosaur

Veterinary Voices: Discovering a new dinosaur species: *Dracorex hogwartsia*; August, p 490.

Editors' Guest

Old age is not a disease; February, p 70.

Are you current on your vaccines? May, p 254.

Why we gave fecal centrifugation a spin; July, p 414.

Our patients remain with us: that is what experience means (reprinted from The Lancet); September, pp 550-552.

Electrocardiography

Skills Laboratory: How to determine and interpret the mean electrical axis; January, pp 28-36.

Endoscopy Brief

Transurethral cystoscopy and diode laser incision to correct an ectopic ureter; September, pp 558-559.

Feline Inflammatory Hepatobiliary Disease

Identifying and helping cats with inflammatory hepatobiliary disease; May, pp 290-304.

Ferret

Clinical Exposures: Biliary cystadenomatosis in a ferret; April, pp 199-200.

Fluid Therapy

Practical Matters: Intravenous solutions: Should I worry about osmolarity? July, p 424.

Fluid therapy: Choosing the best solution for each patient; September, pp 579-589.

Foreign Bodies

Research Updates: Determining the significance of blood chemistry changes in dogs with GI foreign bodies; May, p 267.

Clinical Exposures: A dog with a non-healing flank wound; August, pp 495-500.

Gastric Dilatation-Volvulus

Key gastrointestinal surgeries: Incisional gastropexy; April, pp 213-218, 224-225.

Gastroesophageal Intussusception

A challenging case: Acute-on-chronic vomiting in a German shepherd; October, pp 652-659.

Gastrointestinal Diseases

Research Updates: Determining the significance of blood chemistry changes in dogs with GI foreign bodies; May, p 267.

CVC Highlights: Don't miss these commonly misdiagnosed gastrointestinal diseases; November, pp 716-718.

Gastrointestinal Surgeries

Symposium on key gastrointestinal surgeries: Introduction; April, p 206.

Key gastrointestinal surgeries: Gastrotomy; April, pp 207-210, 224-225.

Key gastrointestinal surgeries: Incisional gastropexy; April, pp 213-218, 224-225.

Key gastrointestinal surgeries: Intestinal biopsy; April, pp 220-225.

Key gastrointestinal surgeries: Intestinal anastomosis; April, pp 226-229, 233-234.

Key gastrointestinal surgeries: Omentalization; April, pp 230-234.

Geriatric Medicine

Editors' Guest: Old age is not a disease; February, p 70.

Osteoarthritis in cats: Still a mass of unknowns; February, pp 104-108.

Providing the best care for senior cats; February, pp 110-117.

How to identify the cause of weight loss in geriatric cats; July, pp 438-453.

Giardiasis

An update on three important protozoan parasitic infections in cats: cryptosporidiosis, giardiasis, and tritrichomoniasis; March (suppl.), pp 18-32.

Gingivostomatitis

Dental Corner: Feline gingivostomatitis: How to relieve the oral discomfort; February, pp 76-78.

Greyhounds

Using a dental root elevator to remove footpad corns in dogs: Two practitioners' experience; December, pp 778-780.

Guest Commentary

Now is the time to take a stand on animal welfare; August, p 482.

Hepatobiliary Disease

Identifying and helping cats with inflammatory hepatobiliary disease; May, pp 290-304.

Primary hepatic and biliary tract tumors in dogs and cats: An overview; June, pp 384-395.

Hepatocellular Carcinoma

Research Updates: Is surgery best for massive hepatocellular carcinoma in dogs? May, p 266.

Hepatozoonosis

A challenging case: A dog with intermittent pain and fever; December, pp 767-775.

Hoarding of Animals

Animal hoarding: Its roots and recognition; August, pp 520-531.

Hyperadrenocorticism

Practical Matters: Urine cortisol:creatinine ratio—the most useful normal test around; July, p 424.

Hypoalbuminemia

Practical Matters: Boost your hypoalbuminemia workup; February, p 92.

Hypotension

Anesthesia-related hypotension in a small-animal practice; January, pp 22-26.

Immunotherapy

Allergen-specific immunotherapy for canine atopic dermatitis: Making it work; September, pp 590-605.

Client information sheet—Allergen-specific immunotherapy: 4 easy steps for home administration; September, pp 607-608.

Infectious Disease

Clinical Exposures: *Mycobacterium avium* infection in a dog; January, pp 14-18.

A challenging case: A German shepherd with a decreasing appetite and azotemia; February, pp 94-102.

Coinfection with multiple tick-borne pathogens; March (suppl.), pp 6-16.

An update on three important protozoan parasitic infections in cats: cryptosporidiosis, giardiasis, and tritrichomoniasis; March (suppl.), pp 18-32.

Update — Avian influenza: An emerging feline threat? June, pp 344-347.

CVC Highlights: Canine influenza: Risks, management, and prevention; November, p 714.

A challenging case: A dog with intermittent pain and fever; December, pp 767-775.

Insulin Therapy

Suggested Reading: Which insulin should I choose now that my options have dwindled? May, pp 262-265.

Intervertebral Disk Disease

Clinical Exposures: Intervertebral disk disease: An unusual cause of a cat's lameness and tail weakness; March, pp 150-155.

Intravenous Therapy

Practical Matters: Intravenous solutions: Should I worry about osmolarity? July, p 424.

Fluid therapy: Choosing the best solution for each patient; September, pp 579-589.

Iron Toxicosis

Toxicology Brief: The toxicity of iron, an essential element; February, pp 82-90.

Knemidocoptes Species

Knemidocoptiasis in birds; December, pp 782-790.

Leading Off

Prepare to re-evaluate your feline vaccination protocols; October, p 632.

Letters

Flea anemia: A left-out cause (Fields, J.C.); Response (Freshman, J.L.); February, p 72.

A mentor and a gentleman (Gilpin, G.N.); March, p 135.

Metaldehyde: Another common toxicosis in dogs (Bruzdzinski, R.); Response (Meadows, I.); June, p 336.

Ehrlichia canis infection and epistaxis (Buhles, W.); Response (Mordecai, A.); August, p 486.

We should care for *all* animals (Allen, D.K.); October, p 630.

Opening eyes to potential abuse (Madsen, L.M.); October, p 630.

Bringing back painful memories (Miller, R.M.); October, p 630.

Liver

Research Updates: Is surgery best for massive hepatocellular carcinoma in dogs? May, p 266.

Symposium on liver function: Introduction; May, p 277.

The diagnostic approach to asymptomatic dogs with elevated liver enzyme activities; May, pp 279-288.

Identifying and helping cats with inflammatory hepatobiliary disease; May, pp 290-304.

How to perform a surgical hepatic biopsy; May, pp 306-311.

Primary hepatic and biliary tract tumors in dogs and cats: An overview; June, pp 384-395.

Mammary Tumors

Malignant mammary tumors: Biologic behavior, prognostic factors, and therapeutic approach in cats; June, pp 352-366.

Mean Electrical Axis

Skills Laboratory: How to determine and interpret the mean electrical axis; January, pp 28-36.

Megaesophagus

A challenging case: Acute-on-chronic vomiting in a German shepherd; October, pp 652-659.

Mind Over Miller

See you in Hawaii; January, p 58.

Not-so-New Breed Vets; February, p 126.

Confronting the urban mentality; March, p 186.

An elephant-size job; April, p 246.

Honoring my mother; May, p 322.

Jobs Americans won't do? June, p 406.

Will the real Dr. Miller please stand up? July, p 474.

A furry solution to global overpopulation; August, p 542.

An abbreviated discussion about abbreviations; September, p 618.

An unintentional Halloween trick; October, p 694.

Kicked? Bitten? Scratched? What a great job! November, p 746.

There's more to life–and private practice–than money; December, p 814.

Mycobacterium avium Infection

Clinical Exposures: *Mycobacterium avium* infection in a dog; January, pp 14-18.

Mycosis

A challenging case: A German shepherd with a decreasing appetite and azotemia; February, pp 94-102.

Myocardial Disease

Pimobendan: Understanding its cardiac effects in dogs with myocardial disease; October, pp 660-668.

Neurologic Disease

Clinical Exposures: Intervertebral disk disease: An unusual cause of a cat's lameness and tail weakness; March, pp 150-155.

Diagnosing and treating common neurologic diseases in rabbits; November, pp 728-736.

Oncology

Clinical Exposures: Biliary cystadenomatosis in a ferret; April, pp 199-200.

Research Updates: Is surgery best for massive hepatocellular carcinoma in dogs? May, p 266.

Research Updates: Thoracoscopy: A viable treatment of lung tumors in dogs; May, p 266.

Research Updates: The utility of ultrasonography to detect brachial plexus tumors in dogs; May, p 267.

Symposium on oncology: Introduction; June, p 351.

Malignant mammary tumors: Biologic behavior, prognostic factors, and therapeutic approach in cats; June, pp 352-366.

An update on diagnosing and treating urinary bladder transitional cell carcinoma in dogs; June, pp 369-381.

Primary hepatic and biliary tract tumors in dogs and cats: An overview; June, pp 384-395.

A challenging case: A cat with weight loss and an abdominal mass; September, pp 563-578.

Practical Matters: Difficulties in diagnosing transitional cell carcinoma; October, p 638.

Practical Matters: Things to remember to calculate chemotherapy dosages correctly; October, p 638.

Orthodontics

Dental Corner: Canine orthodontics: Providing healthy occlusions; July, pp 427-433.

Orthopedics

Research Updates: Surgically treating cruciate ligament rupture in cats; May, p 268.

Osteoarthritis

Osteoarthritis in cats: Still a mass of unknowns; February, pp 104-108.

Paecilomycosis

A challenging case: A German shepherd with a decreasing appetite and azotemia; February, pp 94-102.

Pancreatitis

Is it pancreatitis? March, pp 158-167.

Serial serum pancreatic lipase immunoreactivity concentrations in a dog with histologically confirmed pancreatitis; March, pp 170-176.

Parasitology

CAPC guidelines offer best practices for parasites; March (suppl.), p 2.

Primary guidelines of the Companion Animal Parasite Council; March (suppl.), pp 2-4.

Coinfection with multiple tick-borne pathogens; March (suppl.), pp 6-16.

An update on three important protozoan parasitic infections in cats: cryptosporidiosis, giardiasis, and tritrichomoniasis; March (suppl.), pp 18-32.

Editors' Guest: Why we gave fecal centrifugation a spin; July, p 414.

Optimize intestinal parasite detection with centrifugal fecal flotation; July, pp 455-464. Clarification: September, p 562.

A challenging case: A dog with intermittent pain and fever; December, pp 767-775.

Knemidocoptiasis in birds; December, pp 782-790.

Periodontal Disease

Dental Corner: A foundation for treating canine periodontal disease; October, pp 640-649. Correction: December, p 762.

Pet-Child Relationship

Ensuring a behaviorally healthy pet-child relationship; October, pp 670-682.

Client information sheet—Bringing home baby: Introducing a pet to your new arrival; October, pp 683-684.

Pimobendan

Pimobendan: Understanding its cardiac effects in dogs with myocardial disease; October, pp 660-668.

Practical Matters

Differentiate cocci from imposters in the urine; February, p 92.

Boost your hypoalbuminemia workup; February, p 92.

Control recurrent pyoderma by determining its cause; February, p 92.

Urine cortisol:creatinine ratio—the most useful normal test around; July, p 424.

Intravenous solutions: Should I worry about osmolarity? July, p 424.

Setting the stage for successful referrals; July, p 426.

Difficulties in diagnosing transitional cell carcinoma; October, p 638.

Things to remember to calculate chemotherapy dosages correctly; October, p 638.

Abnormally low capnography readings may not be due to hyperventilation; October, p 639.

Pyoderma

Practical Matters: Control recurrent pyoderma by determining its cause; February, p 92.

Rabbits

Diagnosing and treating common neurologic diseases in rabbits; November, pp 728-736.

Radiography

Get the answers you need about digital radiography; December (suppl.), p 2.

Digital radiography: Is it a good fit for your practice? December (suppl.), pp 4-8.

Exploring your digital radiography equipment options; December (suppl.), pp 9-13.

Getting the most out of digital image viewing; December (suppl.), pp 14-18.

An introduction to DICOM; December (suppl.), pp 19-20.

How to store digital images and comply with medical recordkeeping standards; December (suppl.), pp 21-24.

Referrals

Practical Matters: Setting the stage for successful referrals; July, p 426.

Renal Transitional Cell Carcinoma

A challenging case: A cat with weight loss and an abdominal mass; September, pp 563-578.

Research Updates

Is surgery best for massive hepatocellular carcinoma in dogs? May, p 266.

Thoracoscopy: A viable treatment of lung tumors in dogs; May, p 266.

Determining the significance of blood chemistry changes in dogs with GI foreign bodies; May, p 267.

The utility of ultrasonography to detect brachial plexus tumors in dogs; May, p 267.

Surgically treating cruciate ligament rupture in cats; May, p 268.

Skills Laboratory

Skills Laboratory: How to determine and interpret the mean electrical axis; January, pp 28-36.

Social Work

CVC Highlights: Tapping social workers to help support distressed pet owners; November, p 715.

Suggested Reading

IVERHART MAX™
(ivermectin/pyrantel pamoate/praziquantel)

Caution : Federal (US) law restricts this drug to use by or on the order of a licensed veterinarian.

Brief Summary: Please consult package insert for complete product information.

Indications: For use in dogs to prevent canine heartworm disease by eliminating the tissue stage of heartworm larvae (*Dirofilaria immitis*) for a month (30 days) after infection and for the treatment and control of roundworms (*Toxocara canis, Toxascaris leonina*), hookworms (*Ancylostoma caninum, Uncinaria stenocephala, Ancylostoma braziliense*), and tapeworms (*Dipylidium caninum, Taenia pisiformis*).

Precautions: Use with caution in sick, debilitated, or underweight animals and dogs weighing less than 10 lbs. The safe use of this drug has not been evaluated in pregnant or lactating bitches. The effective use of this drug for the treatment and control of tapeworms has not been evaluated in dogs less than 15 pounds.

All dogs should be tested for existing heartworm infection before starting treatment with IVERHART MAX Chewable Tablets, which are not effective against adult *D. immitis*. Infected dogs should be treated to remove adult heartworms and microfilanae before initiating a heartworm prevention program.

While some microfilanae may be killed by the ivermectin in IVERHART MAX Chewable Tablets at the recommended dose level, IVERHART MAX Chewable Tablets are not effective for microfilanae clearance. A mild hypersensitivity-type reaction, presumably due to dead or dying microfilanae and particularly involving a transient diarrhea, has been observed in clinical trials with ivermectin alone after treatment of some dogs that have circulating microfilanae.

Warning: Keep this and all drugs out of reach of children. In case of ingestion by humans, clients should be advised to contact a physician immediately. Physicians may contact a Poison Control Center for advice concerning cases of ingestion by humans.

Adverse Reactions: In clinical field trials with ivermectin/pyrantel pamoate, vomiting or diarrhea within 24 hours of dosing was rarely observed (1.1% of administered doses). The following adverse reactions have been reported following the use of ivermectin: depression/lethargy, vomiting, anorexia, diarrhea, mydriasis, ataxia, staggering, convulsions and hypersalivation.

Animal Safety: Studies with ivermectin indicate that certain dogs of the Collie breed are more sensitive to the effects of ivermectin administered at elevated dose levels (more than 16 times the target use level of 6 mcg/kg) than dogs of other breeds. At elevated doses, sensitive dogs showed adverse reactions which included mydriasis, depression, ataxia, tremors, drooling, paresis, recumbency, excitability, stupor, coma and death. No signs of toxicity were seen at 10 times the recommended dose (27.2 mcg/lb) in sensitive Collies. Results of these studies and bioequivalence studies support the safety of ivermectin products in dogs, including Collies, when used as recommended by the label.

In a laboratory safety study, 12-week-old Beagle puppies receiving 3 and 5 times the recommended dose once weekly for 13 weeks demonstrated a dose-related decrease in testicular maturation compared to controls.

How Supplied: IVERHART MAX Chewable Tablets are available in four dosage strengths (see dosage section) for dogs of different weights. Each strength comes in a box of 6 chewable tablets and in a box of 12 chewable tablets, packed 10 boxes per display box.

Storage Conditions: Store at controlled room temperature of 59°- 86°F (15°- 30°C). Protect product from light.

NADA 141-257, Approved by FDA. IVERHART MAX is a trademark of Virbac Corporation
